DETAILED ACTION

Receipt is acknowledged of a request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e) and a submission, filed on April 28, 2004. The submission, however, is not fully responsive to the prior Office action because an actual amendment to the drawings was not submitted along with the request. Since the submission appears to be a *bona fide* attempt to provide a complete reply to the prior Office action, applicant is given a shortened statutory period of Three months from the mailing date of this letter, whichever is longer, to submit a complete reply. This shortened statutory period for reply supersedes the time period set in the prior Office action. This time period may be extended pursuant to 37 CFR 1.136(a).

Specification

1. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-References to Related Applications.
©Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).

Art Unit: 2613

- (e) Background of the Invention.
 - 1. Field of the Invention.
 - 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.
- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (i) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.
- (l) Sequence Listing (see 37 CFR 1.821-1.825).

Drawings

The drawings are not labeled in the English alphabet. The Examiner must be able to confirm that all the elements described in the detailed Specification are included in the drawings. In addition, some of the drawings are not functionally labeled. For example, box 52 of fig. 4 should include the function of such item just like item 13 of the same figure (fig. 4). The applicant should also review all the figures of the drawings for the same type of correction.

Claims

While it appears that the claims are properly written, the applicant is urged to review the claims in order to expedite the prosecution. Note that the numeral reference made to the drawings in the claims is not necessary.

- 2. Claims 1-10 would be allowable if rewritten or amended to overcome the objections raised in the examination of the present application.

Art Unit: 2613

Conclusion

4. This application is in condition for allowance except for the following formal matters:

The drawings must be corrected as noted above.

This application is in condition for allowance except for the following formal matters:

The correction to the drawings must be submitted.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **THREE MONTHS** from the mailing date of this letter.
